

MOL Group Corporate Mission (From April 1st 2021)

From the blue oceans, we sustain people's lives and ensure a prosperous future.

MOL Group Vision (From April 1st 2021)

We will develop a variety of social infrastructure businesses in addition to traditional shipping businesses, and will meet the evolving social needs including environmental conservation, with innovative technology and services.

MOL group aims to be a strong and resilient corporate group that provides new value to all stakeholders and grows globally.

MOL Group Values

MOL CHARTS (Revised as of April 1st 2021)

Challenge Innovate through insight

Honesty Do the right thing

Accountability Commit to acting with a sense of ownership

Reliability Gain the trust of stakeholders

Teamwork Build a strong team

Safety Pursue the world's highest level of safety culture

Sustainability Issues (Materiality)

- Value-added transport services
- Marine and global environmental conservation
- Innovation for development in marine technology
- Human resource cultivation and community development
- Governance and compliance to support businesses

Note: Bunker Prices are the average for all the major fuel grades.

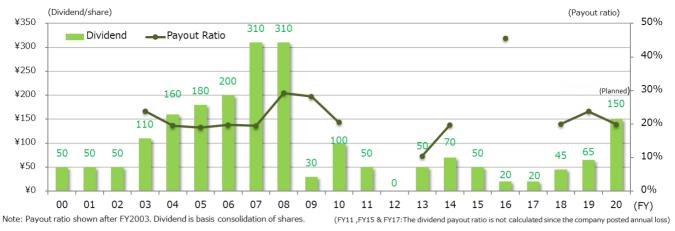

B/S

Note: "Shareholders' Equity" refers to:

- ➤ To FY2005: Shareholders 'equity on the consolidated Balance Sheet
- > From FY2006: Owners' equity plus accumulated gains/losses from valuation and translation adjustments

Dividends

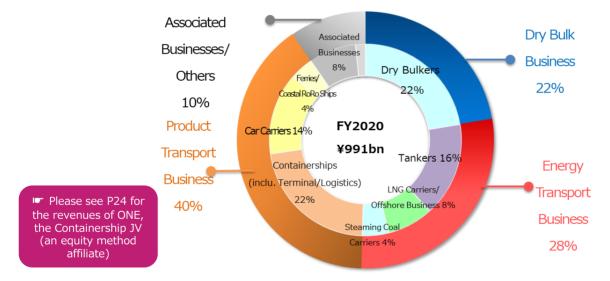

[Dividend Policy]

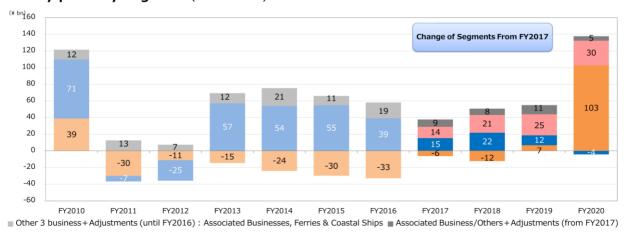

- ☐ The company recognizes the importance of increasing corporate value through aggressive business investment and returning profits to the shareholders through dividends.
- We are seeking to increase our corporate value per share while utilizing internally reserved funds and solidifying our financial position.
- □ In consideration of the above, the company will use 20% as a guideline for the dividend payout ratio over the coming terms, and pay dividends in conjunction with consolidated performance. However, MOL will address the need to increase the ratio in mid- and long-term.

☞ Please also see the bottom of P10 for our dividend policy.

Revenue by Segment (Consolidated)

Ordinary profit by Segment (Consolidated)

- Bulkships (until FY2016)
- : Dry Bulkers, Tankers, LNG Carriers/Offshore Business, Car Carriers

- Containerships (until FY2016)

- Energy Transport Business (from FY2017)
- : Tankes, LNG Carriers/Offshore Business, Steaming Coal Carriers
- Dry Bulk Business (from FY2017)
 - : Dry Bulkers (excl. Steaming Coal Carriers)
- Product Transport Business (from FY2017)
- : Car Carriers, Containerships, Ferries & Coastal RoRo Ships

Business Activities

Dry Bulk Business

/⊋p.15

Dry Bulkers (excluding Steaming Coal Carriers) With one of the world's largest fleets, MOL reliably transports large quantities of such dry bulk cargo as iron ore, coal, grains, woodchips, biomass fuels, cement, fertilizer, salt etc. Our fleet includes highly versatile bulk carriers as well as specialized vessels for specific cargo types. In April 2021, the small- and medium- sized bulker business, wood chip carrier business, Panamax business (excluding services for steel manufacturers and domestic electric power companies) and a subsidiary, Mitsui O.S.K. Kinkai, were integrated to provide services as a new company, MOL Drybulk.

Energy and Offshore Business

Renamed from "Energy Transport Business Unit" as of April 1, 2021

₯p.17

Tankers

With a tanker fleet of one of the largest sizes in the world, MOL develops businesses globally. Our fleet includes crude oil tankers; product tankers (carry naphtha, gasoline, and other refined petroleum products); chemical tankers (carry liquid chemical products); methanol tankers; and LPG tankers (carry liquefied petroleum gas).

LNG Carriers and Offshore Business

Demand for liquefied natural gas (LNG) is increasing worldwide as a clean energy source. Mitsui O.S.K. Lines is world's top LNG carriers in terms of ownership, management, and operation, and is making cutting-edge efforts, including the commencement of operations of an icebreaking LNG carrier that opened the way to the Northern Sea route for the first time among Japanese carriers. In addition to transportation, we are investing heavily in offshore businesses that are expected to grow further in the future, such as FPSO, FSRU, and powerships. Based on the technologies and achievements we have accumulated to date, we will continue expanding our business domains in the LNG energy value chain.

Steaming Coal Carriers MOL transports coal for thermal power generation, mainly on medium-to long-term transport contracts with electric power companies in Japan. Considering the expected growth, we also engage aggressively in coal transport for emerging countries. The Steaming Coal & Renewable Energy Project Division coordinates with other divisions in the Unit to meet diversifying customer needs.

Product Transport Business

∠>p.23

Car Carriers

MOL stably provides transport services to meet the changing needs of automakers moving production to optimal sites around the world. We operate globally with specialized car carriers that can effectively transport any type of vehicle from passenger cars to construction equipment.

Containerships (including Logistics and Terminal Business)

and overseas.

Through a global network provided by Ocean Network Express (ONE), a company formed by the integration of the containership businesses of three Japanese shipping companies, we transport containers loaded with electric products, automotive parts, clothes, furniture, food products, and more around the world. We also operate container terminals and logistics businesses in Japan

Ferries & Coastal RoRo Ships MOL operates the ferry business, which transports passengers, passenger cars and freight cars (trucks, trailers, etc.), and the coastal RoRo ships business, specializing in the transport of freight vehicles. We are increasing our presence as the leader of an ecofriendly modal shift in domestic logistics.

Associated Businesses

∠>p.29

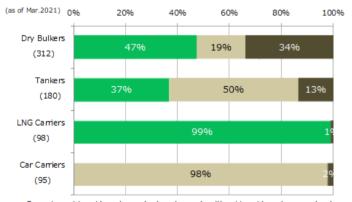

Leveraging the know-how accumulated over more than 130 years mainly in the marine transport business, we are promoting various businesses in related activities including real estate, tugboats, a cruise ship (the NIPPON MARU), and trading.

Outline of the Overall Strategy

Please see our website for the full material of "Rolling Plan 2021"

https://www.mol.co.jp/en/ir/management/plan/index.html

JPY 200Bil investment to be addressed to Low-Carbon or Decarbonization businesses during FY2021-23

Environment

Become a Group of Business Units with No.1 Competitiveness in Respective Areas

Enhancement of Organizational Strength

- ➤ Formulate strategies from three longstanding perspectives: "environmental strategy" "portfolio strategy" and "business strategy"
- ➤ The key points of RP2021 are 1) the strengthening of "environmental strategy" and 2) "regional strategy" as the core of our business strategy.
- Continue to work on the "Enhancement of organizational strength" and the "Work-style reform" that underpin the three strategies.

Environmental Strategy (Strengthening the Environmental Perspectives in Three Core Strategic Areas)

We will invest approximately **¥200 billion** in low carbon/decarbonization fields over three years from FY2021 to FY2023

| | Main Initiatives |
|---|--|
| Environmental strategy | Revise the MOL Group environmental vision 2.0 to 2.1 and accelerate initiatives Moving up the net GHG emission zero schedule (by 2050) Develop a GHG reduction roadmap Introduction of internal carbon pricing Promoting alternative fuel, operational efficiency, energy conservation |
| Portfolio strategy | Expand "low environmental impact" and "low carbon" businesses Taking in increasing LNG demand (LNG carriers, FSRUs, powerships) Enter offshore wind power business |
| Business strategy Realize stress-free services, by responding to customer's desire to "see" | Develop services that visualize the environmental impact and reduction effects Disclose carbon footprint in anticipation of customer needs and develop systems and data to enable that disclosure Improve operational efficiency and visualize how much it contributes to GHG emission reduction |

Regional Strategy (As the Core of Business Strategy)

The core of our business strategy will be "regional strategy." We will pursue potential projects in multifaceted ways that match our overall strategy and acquire large-scale projects **not** limited to transportation focusing in Asia by demonstrating MOL Group's collective strength.

Realize new businesses by strengthening cooperation among divisions and overseas subsidiaries

- Further promote "ONE MOL" concept
- ✓ Enhance internal resources
- ✓ Expand collaboration area with external partners

Accelerate decision making process by introducing "lead sprints"

Acquire
largescale
projects
(not
limited to
transport)

Investment Plan

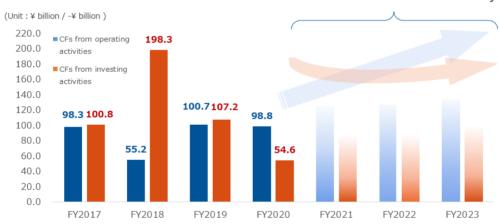

- Make investments totaling ¥450 billion from FY2021 to 2023, while securing Free Cash Flow by steadily accumulating cash flows from operating activities as well as generating cash from assets, businesses, and projects. Within the ¥450 billion, ¥200 billion will be invested in carbon reduction/decarbonization projects.
- Expect a contribution of ¥40 billion in annual profits by FY2027 through the total ¥450 billion investment.

| | Decisions already made at end FY20 | Investments to be decided FY21 to 23 | Total | Expected returns (*) | Detail |
|--|--|--------------------------------------|-------|----------------------|---|
| Carbon reduction/ decarbonization projects | 95.0 | 110.0 | 205.0 | 21.0 | |
| (1) GHG reduction of MOL Group- operated vessels | 41.0 | 50.0 | 91.0 | - | LNG-fueled ferries/coal carriers, Wind Challenger, etc. |
| (2) Development of carbon reduction/decarbonization projects | 54.0 | 60.0 | 114.0 | - | Newbuilding LNG carriers, powerships / FSRUs, offshore wind farms, etc. |
| Other projects | 145.0 | 100.0 | 245.0 | 19.0 | Replacement of vessels in service, etc. |
| Total | 240.0 | 210.0 | 450.0 | 40.0 | |

* Contribution to ordinary profit in FY2027

Outlook of Cash Flow

Secure ¥100 billion Free CF in the next three years

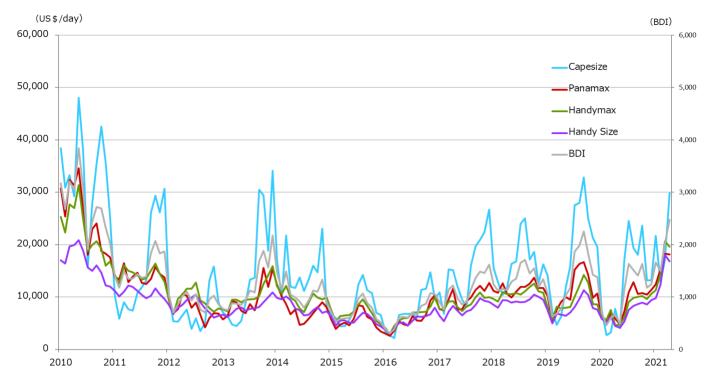

Summary of Profit Plan, Financial Strategies and Dividend Policy

| | FY2020 (results) | FY2021 (forecast) | FY2022 (Forecast) | FY2023 (Forecast) | | FY2027 (target) |
|------------------------------------|---------------------|----------------------|----------------------|----------------------|-------|--------------------|
| [Profit Target] | | | | | | |
| Ordinary Profit | ¥133.6 billion | ¥100.0 billion | ¥80.0 billion | ¥90.0 billion | | ¥130.0 billion |
| ROE | 16.5% | 15% | 10% | 10% | | 10~12% |
| [Cash Flows] | | | (FY2021~ | -23 cumulative) | (FY20 | 21~26 cumulative) |
| CFs from operating activities (1) | ¥98.8 billion | ¥350.0 billion | | | | ¥800.0 billion |
| CFs from investment activities (2) | ¥54.6 billion | | ¥250.0 billion | | | |
| Of which: Total investi | ment amount | | | ¥450.0 billion | | ¥1,000.0 billion |
| Asset sales | / cash generation | | | -¥200.0 billion | | -¥400.0 billion |
| Free CF [(1) + (2)] | 44.2 billion | | | ¥100.0 billion | | ¥200.0 billion |
| [Financial Target] | | | | | | |
| Net Gearing Ratio | 1.63 | | | 1.25 | | 1.00 |

- The profit target for FY2027 is ordinary profit of ¥130 billion and to maintain stable ROE of 10-12%
- The financial target is net gearing ratio of 1.00 and we aim to achieve this by FY2027. We plan to generate ¥100 billion of Free CF in three years from FY2021 to FY2023 to improve our financial position and reduce the net gearing ratio.
- As soon as we achieve a certain degree of improvement in our financial position (*1), we will review our dividend payout ratio, even before fiscal year 2027 (*2).
- *1 Net gearing ratio, equity ratio, etc. are used as KPIs.
- *2 The level will be decided based on the trend of companies listed on the Tokyo Stock Exchange.

Dry Bulker Markets(Spot Charter Rate/TC Average) : Monthly Average

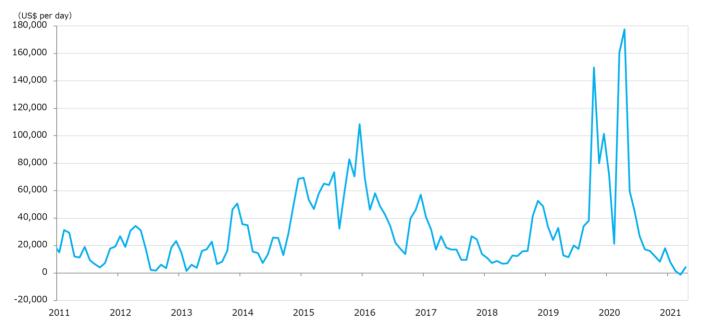

Source: MOL internal calculation based on TDS and others.

(Remarks)

- · Capesize TC average: until April 2014=4TC, in/after May 2014=5TC(new)
- BDI (Baltic Dry Index) is calculated as an arithmetic average of the drybulker markets of the four different vessel types before March 2018 and the three different vessel types except for Handy size after March 2018. Therefore, a fluctuation of BDI does not always coincide with those of the four drybulker markets.

MOL in Energy Value Chain

FPSO (Floating Production, Storage & Offloading System)

Photo courtesy of MODEC, Inc.

A floating facility for producing crude oil offshore. The crude oil is stored in tanks in the facility and directly offloaded to shuttle tankers for transport to the destination.

Self-Elevating Platform Vessel

A vessel equipped with legs that rest on the seabed and a platform that moves up and down. The vessel installs offshore wind power generation systems with a crane by moving the platform up to the sea surface. In addition to installing offshore wind power generation systems, it can engage in supporting maintenance of offshore oil and gas rigs.

Subsea Support Vessel

A working vessel for the installation, maintenance, and recovery of seabed facilities necessary for the development and production of offshore oil and gas fields.

Shuttle Tanker

Tankers that transport crude oil from offshore oil rigs, such as FPSOs, to onshore refineries as an alternative for pipelines. Shuttle tankers are fitted with a unique system that enables cargo to be loaded from the bow of the vessel, rather than from the side like ordinary tankers, while maintaining a certain distance from the offshore platform.

Service Operation Vessel

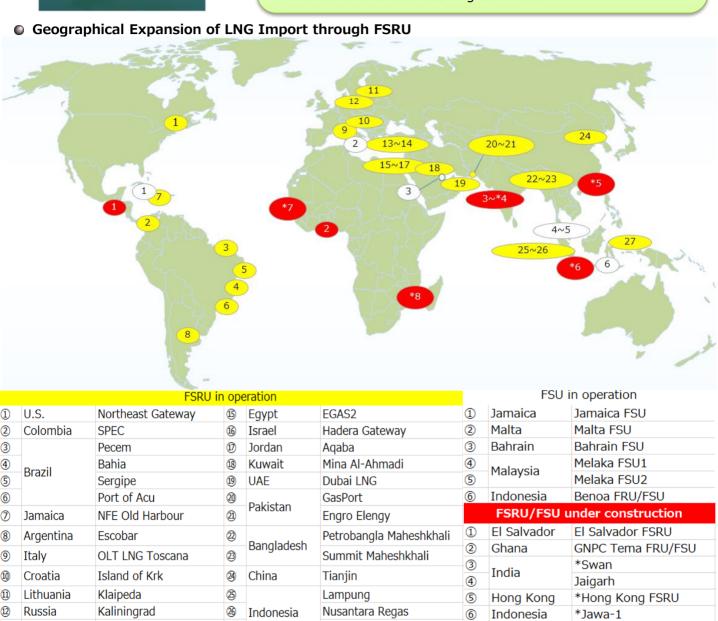

SOV has accommodation for maintenance technicians working on wind turbines that makes a offshore wind farm, allowing them to stay on-site for extended periods.

SOV constantly maintains a safe distance from the offshore wind farm (= Dynamic Position System), and equipped with motion compensation function gangway. This allows technicians to move safely between the vessel and the offshore wind farm.

FSRU (Floating Storage and Regasification Unit)

An LNG vessel that is equipped with the facility for storing and regasification of LNG, which is then pressurized and piped ashore. Plans to introduce FSRUs in regions around the world are making steady progress as they can set up LNG receiving terminals in shorter amount of time and with less cost than conventional onshore receiving terminals.

MOL Magsaysay Maritime Academy (2018-) Dasmariñas, Philippines

Making Processes for Realizing Safe Operation Visible

MOL has introduced objective performance indicators for measuring safety levels, and also set the following numerical targets, including the Four Zeroes.

- Four Zeroes as MOL group (an unblemished record in terms of serious marine incidents, oil pollution, fatal accidents and heavy cargo damage)
- LTIF(*1) (Lost Time Injury Frequency): 0.5 or below (from fiscal year 2020)
- 3 Average Downtime(*2): 24.00 hours/ship or below
- Downtime Frequency Rate(*3): 1.00/ship or below

Average Vessel Stoppage Time(*2), and Percentage of Incidents Resulting in Stoppage(*3)

*Note: Four Zeroes are applicable to about 800 vessels of MOL Group's operating fleet. LTIF, Average Vessel Stoppage Time and Percentage of Incidents Resulting in Stoppage are applicable to about 243 vessels of MOL Group's owned vessel.

(*1) LTIF (Lost time injury frequency): Number of work-related accidents per one million hours worked that resulted in time lost from work of one day or more. In the scope of calculations, we originally included only workplace illnesses and injuries requiring disembarkation from the ship. The LTIF criteria was strengthened from fiscal 2015, and now includes any workplace illness or injury that prevents a worker from resuming even a reduced workload on that day, regardless of whether the illness or injury requires disembarkation.

Average for all industries (2019) was 1.80; for transportation and postal industry, 3.50 (Source: 2019 Survey on Industrial Accidents issued by the Ministry of Health, Labour and Welfare) In addition, MOL's LTIF goal was tightened to 0.5 or below from fiscal year 2020. (prior: 0.7 or below

- (*2) The average number of hours of downtime divided by vessels in a period.
- (*3) The average number of downtime case in a period divided by number of the vessels.

Environmental Vision 2.0

Amidst growing momentum toward the prevention of global warming since the Paris Agreement came into effect, the International Maritime Organization (IMO) adopted its "strategy for reducing Greenhouse Gas (GHG)" in April, 2018, which comprehensively mandates a target to reduce GHG in international shipping, measures to achieve the target, and so on. This is the world's first commitment as a single sector that sets a global target of zero GHG emissions in this century.

In place of its conventional "environmental Vision 2030," MOL established the "MOL Group Environmental Vision 2.0" in 2020 which clarifies our commitment to achieving the IMO target. Responding to rapidly changing social needs, however, we plan to update this to the "MOL Group Environmental Vision 2.1' by the end of the first half of fiscal 2021.

[MOL Group Environmental Vision 2.0]

The MOL Group is committed to achieve sustainable "Net Zero GHG Emissions" through collective efforts with all capabilities.

Mid-tolong-term target

- ✓ Deploy commercial "Net GHG Zero Emissions" deep sea vessels by 2030.
- ✓ Reduce total annual GHG emissions from the ships by 50% in 2050 compared to 2008.
- ✓ Achieve Net Zero GHG emissions within this century, pursuing earlier.

Initiatives to achieve targets

- ✓ **Introduction of clean alternative fuels:** Further promote LNG fuels and introduce next-generation zero emission fuels that will play the following major roles.
- ✓ **Introduction of energy-saving technologies:** Equip vessel with hard sails under the "Wind Challenger" project; introduce other new technologies.
- ✓ Boost operating efficiency: Improve fuel efficiency of existing vessels and reduce operational costs through real-time monitoring of operational status
- ✓ **Build business models that enable net zero:** Actively take part in the establishment of regulations and rules through industry associations and related government ministries
- ✓ **Expansion of low-carbon businesses:** Develop businesses in the next-generation fuel business domains such as hydrogen in addition to FSRUs, LNG-to-powership, and renewable energy

Initiatives

Task Force on Climate-related Financial Disclosures (TCFD) TCFD is a task force established by Financial Stability Board (FSB), and its recommendations encourage companies to disclose information on climate change-related impacts and risks facing businesses and share it among institutional investors and financial institutions. Our company supports these recommendations and has been conducting a scenario analysis since FY2018. After in-depth exchange of opinions with our sales divisions, we analyze the long-term outlook for key transportation demand adding our own perspectives and use the results to promote individual initiatives to achieve the goals set forth in MOL Group Environmental Vision 2.0.

Getting to Zero Coalition

We are a member of this international consortium of companies that aims to operate ships powered by zero-carbon energy sources and establish a production, distribution, storage and supply system for zero-carbon energy sources by 2030.

Clean Fuel Ammonia Association

The association was established by the Japan Science and Technology Agency with the aim of establishing a value chain from the supply to the use of CO2-free ammonia, and works to conduct technology development/evaluation, economic evaluation, policy proposals, international cooperation, etc.

Carbon Disclosure Project (CDP)

CDP is a U.K.-based non-governmental organization that represents 827 institutional investors all over the world. It holds about \$100 trillion in total. It sends specific questionnaires asking about strategies on climate change and on greenhouse gas emissions to companies. Answers and scores of the results are publicly announced around the world, and the scores are becoming a key indicator in measuring corporate value. MOL has responded to CDP's inquiries every year, and was recognized for "A-" in FY2020.

Environmental Regulations by IMO

MOL Group is committed to reduce its environmental impact while preserving the global environment through company-wide efforts to response to the variety of environmental regulations.

Ballast Water Management Convention

| 2016 | 20 | 17 | 2018 | 2019 | 2020 | 2021 |
|----------|------|----|------------------|------|----------------|------|
| (Adopted | d in | | For existing ves | , | ears from Sept | |

On the other hand, ballast water is discharged when loading cargo as the weight it provides is no longer needed.

A convention to prevent cross-border transfer of foreign marine organisms through vessel ballast water was adopted in 2004 and has been in effect since September 2017. Under the convention, vessels, including existing vessels, are mandated to install ballast water treatment systems by September 2024.

[MOL's Action]

- √ The Company has been installing ballast water treatment systems on its own vessels since 2014, prior to the entry into force of the convention.
- As of April 2020, the Company installed such systems on 167 vessels and plans to install them on all of owned vessels within the time limit required by the convention.

SOx Regulation

| 2016 | 2017 | 2018 | 2019 | 2020 | 2021 |
|------|------------|----------|------|---------------|---------------|
| | Sulfur lin | nit 3.5% | | Sulfui 0.5 | r limit 5% |

Regulation limits the sulfur content in fuel oil to control SOx volume in exhaust emissions. The fuel sulfur content has been tightened from 3.5% or less to 0.5% or less since 2020. In order to comply with the regulations, the Company considers the most appropriate method for each vessels from three ways shown in the right.

[MOL's Action]

- While our approach for the time being focuses on the use of compliant oil, we are also installing SOx scrubbers mainly on VLCCs and Capesize bulkers and plan to install them on approximately 100 vessels by 2022. (Installed on 78 vessels as of April 2021)
- ✓ As shown in the right, we are promoting projects related to the use of alternative fuels.

| Methods | Pross | Cons/Issue | | | | |
|-----------------------------------|---|--|--|--|--|--|
| Low Sulfur Oil (Compliant Oil) | No initial capital costs | -Higher fuel costs | | | | |
| SOx Scrubber | Lower costs conventional fuel can be used | -High initial cost -Large space required | | | | |
| Alternative Fuel (LNG etc.) | Effective for other environmental regulations | -High equipment cost -Insufficient supply system -Difficult modifications | | | | |
| LNG-Fueled Vessel | Decided to build Japan's | Decided to build Japan's first two LNG-fueled ferries | | | | |
| Methanol-Fueled Vessel | Three vessels in operation | Three vessels in operation since 2016 | | | | |
| Electrically Powered Vessel | Established a joint venture company "e5 Lab". Plan to launch an electrically powered marine fuel supply vessel in 2022. | | | | | |
| Wind Challenger | hard sail on merchant sh | Promote "Wind Challenger Project" which is planning to install hard sail on merchant ships for converting wind energy to propulsive force. Aim to commence operations around 2022. | | | | |

Technology

- (*1) EEDI (Energy Efficiency Design Index) is a measure of a ship's energy efficiency (g/ton-mile) The required EEDI of each Phase is as follows: Phase 0=0%, Phase 1=10%, Phase 2=20% (Applied to new ships)
- (*2) SEEMP (Ship Energy Efficiency Management Plan) is required to be drawn up to show optimal measures of operation that should be adjusted to the characteristics of individual ships, and to be kept onboard a ship. (Applied to both new and existing ships)
- (*3) The regulation for reduction of NOx in exhaust gases: Tier I is applied to ships laid down in 2000-2010, Tier II to ships laid down in/after 2011, and Tier III to ships laid down in/after 2016.
- (*4) The existing ECAs (Emission Control Areas) are: 1. Within 200 miles off the coast of the USA and Canada (NOx/SOx) 2. The USA Caribbean Sea area (NOx/SOx) 3. The Baltic Sea and the North Sea areas (currently only SOx). (From 2021 onward, new shipbuilding will be subject to third-generation NOx regulations.)
- (*5) The guideline aimed at minimizing transfer of invasive aquatic species attaching to the bottom of ships, recommending installation of the systems on vessels to keep the bottom clean of marine organisms and other measures. (It remains as a voluntary guideline during the review period.)
- (*6) The convention prohibits and restricts the fitting and use of treaty-specified hazardous materials, and requires vessels to prepare, record and update inventory lists showing the quantity and location of hazardous materials on ships over a ship's lifetime. The convention shall enter into force 24 months after the following conditions are met:

 Conditions: Ratification by not less than 15 countries representing a combined total G/T of more than 40% of the world's merchant fleet and an

annual ship recycling volume not less than 3% of the combined tonnage of the ratifying countries. (As of April 2021, 16 countries have ratified.)

^(*3) Mainly vessels sold to be scrapped; recycled at scrapping yards

Data scope

 $\hbox{MOL Group consolidated subsidiaries in Japan and overseas. Excludes some small offices.}$

Noted areas such as "(MOL)" are limited to that scope.

Charted vessels are included in the data for MOL vessels and Group company vessels

^(*2) The energy equivalent of heat originated from fuel oil, diesel oil, electricity, municipal gas and other energy consumption.

Scope 2: CO2 emissions originating mainly from electricity consumption

Scope 3: CO2 emissions originating mainly from when the capital goods and/or ship's stores are produced, fuels using by the vessels are generated etc.

 $<\!\!\text{Scope3}\!\!>\!\!\text{CO2 emissions in FY2019 increased due to a change in the reference source of the conversion factor.}$

^(*4) The volume of water used in offices. Most of the water used in vessels is made from seawater recycled.

5 Social Responsibility

Human Rights Protection

Please go to for website for further information # https://mol.disclosure.site/en/themes/201

□ Participation in the UN Global Compact

MOL became the first Japanese shipping company to participate in the United Nations Global Compact in 2005. Since then, MOL has worked to support and practice the 10 principles in 4 areas of the UN Global Compact.

□ Rights of Crewmembers

For crewmembers, in addition to respecting the four human rights in the treaty concerning the maritime Labor convention in 2006 (MLC2006) as mentioned below, we prohibit discrimination by religion, nationality, age, and gender, and establish procedures to address complaints of harassment.

- 1. Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining;
- 2. The elimination of all forms of forced and compulsory labor;
- 3. The effective abolition of child labor; and
- 4. The elimination of discrimination in respect of employment and occupation.

10 Principles of the Global Compact

1: Businesses should support and respect the protection of internationally proclaimed human rights; and 2 : make sure that they are not complicit in human rights

3: Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining:

4: the elimination of all forms of forced and compulsory labour;

5: the effective abolition of child labour; and

6: the elimination of discrimination in respect of employment and occupation.

7: Businesses should support a precautionary approach

to environmental challenges 8: undertake initiatives to promote greater

environmental responsibility; and 9: encourage the development and diffusion of

environmentally friendly technologies.

10: Businesses should work against corruption in all its forms, including extortion and bribery.

External Recognition

General CSR Activities-Related(Including SRI)

Please go to for website for further information https://mol.disclosure.site/en/themes/126

☐ CSR Rating by the FTSE4Good Developed Index Series

FTSE is a global index company owned by the London Stock Exchange. Since 2003, FTSE Russell has included MOL in one of its major indices, the FTSE4Good Developed Index, which is a responsible investment index.

□ FTSE Blossom Japan

Since 2017, MOL has been included in the FTSE Blossom Japan Index, which was developed in 2017 by FTSE and targets Japanese companies making a superior response to environment, social, and governance (ESG) issues.

■ MSCI Japan Empowering Women Index (WIN)

MOL has been included in WIN, which was newly developed in 2017 and targets companies in all industries with superior performance in promoting gender diversity.

□ "White 500" Health & Productivity Management

MOL was selected as a "White 500" company for 2021, which is determined by Japan's Ministry of Economy, Trade and Industry (METI) and Nippon Kenko Kaiqi, for the outstanding health and productivity management. (since 2019)

□ Health & Productivity Stock Selection

MOL has become the first shipping company to be recognized as an outstanding listed enterprise in the 2021 Health & Productivity Stock Selection, which is a joint certification by METI and the Tokyo Stock Exchange (TSE). (fiscal year 2020)

■ Nadeshiko Brand

MOL was selected to the list of "Nadeshiko Brands" under a joint initiative by METI and TSE to promote women's success in the workplace. (fiscal year 2020)

FTSE4Good FTSE Blossom

Safe Operation(Including Recognition of Seafarer Training Program)

□ Standard Training Courses for liquefied gas transportation certified by DNV GL AS

The LNG Carrier Standard Training Course and the LEG/LPG Carrier Standard Training Course implemented globally by MOL were certified by Norway's Det Norske Veritas (DNV) GL AS in 2007 for compliance with the LNG carrier crew ability standards and in 2016 for compliance with the LEG/LPG advocated by SIGTTO(Society of International Gas Tanker and Terminal Operators Ltd.).

Management program for seafarer education and training acquired certification from DNV GL AS

MOL's management program for seafarer education and training was recognized to be effective and certified in its tanker and LNG carrier operations by DNV GL AS in 2012 for compliance with the Competence Management System (CMS).

Environmental Related

■ ISO 14001 Certification

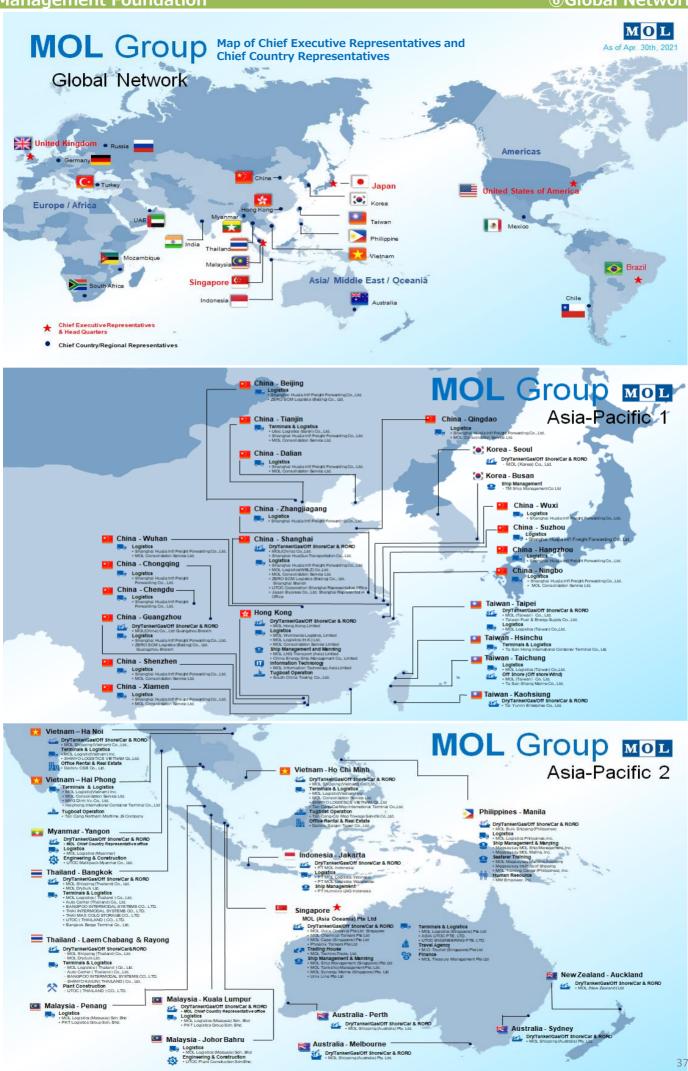

MOL has used its own environmental management system MOL EMS21 since April 2001, and it holds ISO 14001 certification, an International standard for environmental management. (Since 2003)

■ ISO50001 Certification

MOL acquired ISO50001 certification for its energy management system and ISO14001 certification for its environmental management system. Certified companies: (2014) MOL Ship Management Co., Ltd., MOL Ship Management (Singapore) Pte.Ltd., MOL Ship Management (Hong Kong) Company Ltd. and (2015) Magsaysay MOL Ship Management, Inc.

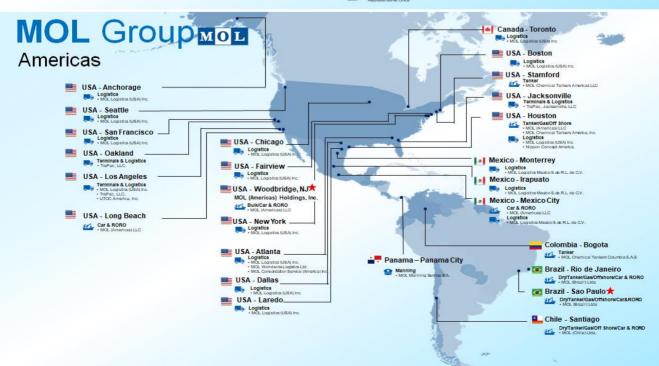

□ Certified as "A-" in CDP Climate Change Report 2020

MOL was rated Leadership Level "A-", in research analyzing climate change data through CDP, an international nongovernment organization. (2020)

[&]quot;Owners' equity" + "accumulated gains/losses from valuation and translation adjustments"

The actual amount calculated by deducting proceeds from the sale of vessels when delivered from "tangible/intangible fixed assets increased"

 $[\]label{eq:continuous} Ordinary\ profit(loss)\ +\ Interest\ expense\ +\ Depreciation\ and\ amortizaion$

Net income / Average shareholders' equity at the beginning and the end of the fiscal year Ordinary profit(loss) / Average total assets at the beginning and the end of the fiscal year

Interest-bearing debt / Shareholders' equity

⁽Interest-bearing debt- cash&cash equivalents) / Shareholders' equity

Excluding "Treasury shares"

The company consolidated its common shares on the basis of one (1) unit for every ten (10) shares effective October 1, 2017. Accordingly, the relevant figures are calculated on the assumption that the consolidation of shares was conducted at the beginning of FY2011.
